#### FCDC MISSION:

- Coordinate response of NE FL medical facilities to natural or man-made disasters
- Facilitate cooperation between hospitals, medical practitioners, medical service agencies, government agencies, and other organizations or individuals concerned with emergency medical services
- Review, develop and recommend programs that will ensure efficient utilization of community resources in a disaster
- Promote and facilitate educational and training programs for persons interested in emergency and disaster preparedness
- Conduct mass casualty drills for hospitals and agencies needed to meet certification standards and maintain a high degree of preparedness within the medical community
